

FINISHER 14™

Textured Feed for Breeding, Growing and Performance Horses

FEATURES

- Highly palatable
- High levels of useable energy
- High fat content. Only vegetable oil added.
- High amount of beet pulp
- Designed to promote normal gut function
- Fully fortified and balanced with all essential vitamins and minerals
- 44 lb/bu clipped, recleaned oats
- Corn free from aflatoxins and fumonisins

FEEDING INSTRUCTIONS

- Feed approximately ½ to 1½ pounds per 100 pounds body weight per day.
- **FINISHER 14** can be added to the current diet to promote more weight gain.
- Always provide good quality forage (hay and/or pasture), salt and clean, fresh water.
- When fed as advised, no additional proteins, vitamins or minerals are necessary.
- Consult your veterinarian concerning proper health programs and always maintain a good worm control program.
- For more details on feeding, please see the following table and notes.

FEEDING GUIDELINE FOR FINISHER 14

| Horse | Average Amount of Feed (lb/day) | Amount of Hay or Pasture Equivalent (lb/day) |
|-----------------|---------------------------------|--|
| Weanlings | 5 | 11 |
| Yearlings | 7 | 15 |
| Stallions | 4 | 18 |
| Pregnant Mares | 5 | 18 |
| Lactating Mares | 10 | 19 |
| Light work | 5 | 16 |
| Medium work | 8 | 16 |
| Intense work | 15 | 16 |

(FEEDING GUIDELINE CONT.)

- This Guideline is for horses with a mature body weight range of 1100-1300 lb (500-590 kg).
- The hay in this Guideline is an average quality mixed hay (12% crude protein & 0.85-0.90 Mcal/lb). As the hay quality drops, the amount of feed will need to be increased and conversely, better quality hay can reduce the quantity of feed needed.
- Pasture equivalent means at the same moisture content and same nutritional quality as the hay. Pasture contains approximately 70 to 80% moisture whereas hay contains approximately 10% moisture. Therefore, 1 lb of hay is equivalent to 3 to 4.5 lb of fresh pasture.
- The amount of feed in this Guideline is meant as a starting point. Individual horse needs will vary; therefore feeding should be adjusted per individual.
- The range of feed required is wide. For "easy keepers" on excellent hay or pasture, the amount of feed may be halved. On the other hand, "hard keepers" on extremely poor hay or pasture may need double the amount of feed.
- The amount of feed given at any one time should be no more than 0.5% of the horse's body weight. For example, a 1000 lb horse should be fed no more than 5 lb per feeding.
- For nursing foals, **ORIGINAL® 16 TEXTURED** is recommended.
- If, for whatever reason, a horse is fed less than 4 lb of feed per day, a comprehensive supplement such as **McCAULEY'S M30®** should be considered as an alternative. Please consult McCauley's nutritionists for more information.

GUARANTEED ANALYSIS

| | |
|--------------------------|------------|
| Crude Protein, Min. | 14.0% |
| Crude Fat, Min. | 10.0% |
| Crude Fiber, Max. | 11.0% |
