

Sentinel Grow & Excel

Innovative equine nutrition for growing, breeding and performance horses.

Life Stage: Adult, Breeding, Grower

Feed Type: Feed

Feed Form: Extruded

Special Needs: Hard Keeper

Packaging: 50-lb bag

Product Description

A nutrient release formula feed for growing, breeding and performance horses. Sentinel® Grow & Excel combines a precise balance of protein, high-fat and high-fiber with low-starch and low-sugar ingredients providing healthful nutrition throughout growth and into performance. This versatile formula is also an ideal choice for breeding stallion and

pregnant mares in late gestation. An extruded feed, Sentinel Grow & Excel offers a safe and natural way to provide essential nutrition that may be easily digested for optimal nutrient utilization.

Features & Benefits

gutWise™ Nutrient Release Technology

A proprietary blend of prebiotics, probiotics, marine-sourced calcium and NutriVantage® for horses helps maintain total digestive health. These components are delivered in an exclusive extruded form to help support nutrient digestibility and availability.

Stable Digestive Environment

Probiotics and prebiotics aid in maintaining digestive health and microbial fermentation for sustained nutrient digestibility, absorption and assimilation.

Gastric Balance

Bioavailable marine-sourced calcium helps support gastric pH and health.

Optimized Nutrition

NutriVantage® for horses incorporates exclusive components that may help aid in nutrient availability and maintenance of a healthy gut environment for immune support.

Limited Starch and Sugar

A low starch and sugar diet is often recommended by veterinarians and nutritionists for horses with metabolic and digestive challenges.

‘Cool’ Energy

A sequential release of energy from fat and fermentable fiber provides lower starch calories to meet complex energy demands and help maintain normal digestive health.

Healthy Rate of Intake

The light and airy nature of extruded feeds may facilitate the breakdown of feed while encouraging slow consumption and more thorough chewing for maintaining digestive health.

Nutrient Density and Release

A nutrient dense diet means more nutrition by weight, potentially delivering more of what your horse needs in less feed for ideal health and body condition.

Built-In Fiber

Fiber sources such as soybean hulls, beet pulp and alfalfa meal may help maintain healthy hind-gut fermentation while providing extra calories in a safe and natural form.

Immune Support

Antioxidant nutrients including stable vitamins and biologically available trace minerals help maintain normal health and metabolism.

Body Tissue & Integrity

Amino acids such as lysine, methionine and threonine are important for growth and maintenance of all tissues including bone, muscle, hoof and hair.

Healthy Skin and Hair Coat

Sources of Omega-3 and Omega-6 fatty acids plus protein, B-vitamins and trace mineral complexes may help promote healthy skin, hair coat and hoof condition.

Joint Support

Omega-3 fatty acids, stable vitamins and balanced minerals may help maintain joint and bone health and strength.
