

An economical quality mineral-vitamin blend to improve blood building, protein repair and metabolism. Formulated to the NRC 2007 Nutrient Requirements of the Horse (based on a 500 kg horse in moderate exercise).

- Contains all 8 water soluble B-vitamins. (for carbohydrate metabolism).
- Contains Vitamin C & Natural Vitamin E (important antioxidants).
- Contains micro-minerals including organic selenium (an antioxidant).
- Contains major amino acids: Lysine, Methionine, Threonine. (for protein building).
- Available in powder or pellet format.
- Contains **dextrose as a carrier**. Our common salt carrier (sodium chloride) was replaced last Fall Horses need 2 ounces of salt daily!

Note: Our pelleted version (for easy range feeding) contains **Alfalfa as a pelleting aid**. Other than that, the formulation is the exact same between powdered and pellet.

INGREDIENTS (Alphabetical Order):

Alfalfa (in pellet format only), Biotin, Choline, Cobalt, Copper, Dextrose, Folic Acid, Glycine, Iodine, Iron, Lysine, Manganese, Methionine, Niacin, Riboflavin, Selenium

**Guaranteed Analysis (mg / kg) powder
format - (For pellets due to alfalfa carrier
values are 50% LESS):**

Biotin	833 mg
Choline	500 mg
Cobalt	10 mg
Copper	2,666 mg
Folic Acid	667 mg
Glycine	16,665 mg
Iodine	67 mg
Lysine	24,998 mg
Manganese	49,990 mg
Methionine	99,990 mg
Niacin	667 mg
Riboflavin	1,000 mg
Selenium (Organic)	22 mg
Thiamine	1,000 mg
Threonine	11,666 mg
Vitamin B12	93,750 mcg
Vitamin C	83,325 mg

Iron

1700 mg

**DAILY FEED RATE (per 500 kg / 1100 lbs
of body weight):**

Feed 1 scoop (25 g) powder daily.

Feed 1 scoop (35 g) pellet daily.

Enclosed scoop is approximately 25-35 g

FORMAT & COST PER DAY:

1.5 kg powder - \$.67 (lasting ~60 days)

2.5 kg pellet - \$0.63 (lasting ~71 days)

12 kg pellet - \$0.58 (lasting ~342 days)
