**Directions For Use:** This feed is designed to be fed with hay and/or pasture. Provide 11% Sweet Pellets in amounts necessary to support the desired body weight and condition. The amount needed will vary depending on many factors, including the quantity and quality of forage, but will typically be in the range of 0.5–1% of body weight daily (0.5–1 lb per 100 lbs of body weight daily) for cattle and goats. Change to this feed gradually over a 7- to 10-day period. Provide 11% Sweet Pellets in two or more feedings per day and maintain a regular feeding schedule. Do not feed more than 0.5% of the animal's body weight (? lb grain per 100 lbs of body weight) in grain at any one time. Do not offer this product on a free-choice basis. Do not allow hot, exercised horses free-choice access to water until they have cooled down.

**Reminder:** Feed is perishable. Store this product in a cool, dry area away from rodents and insects.

**Warning:** DO NOT offer any feed that is spoiled, moldy, rodent or insect infested, or abnormal in appearance or odor, as it may cause illness or death. This product contains supplemental copper. DO NOT feed to sheep or other copper-sensitive species.
