

## Natural vitamin E with selenium, magnesium, and 6 amino acids

Vitamin E and selenium together form a very powerful and effective antioxidant that is both able to neutralize free radicals and reduce the formation of lactic acid. This results in better muscle build-up, better protection against muscle damage, increased stamina, and quicker and better recovery after hard work. EquiForce E+ is based on natural vitamin E (d-alpha tocopherol), which is approx. 40% more effective than synthetic vitamin E. The product is also added magnesium, which strengthens nerve function and acts as a muscle relaxant. Vitamin E also works for strengthening the immune system and is important for fertility in both mares and stallions.
