

Golden Senior

When your steadfast companion reaches its “golden” senior years, you can see the changes in agility, endurance and speed. Their nutrition needs are changing, too. Equis® Golden Senior is formulated to meet a senior horse’s unique nutrition needs with highly digestible and palatable ingredients, vitamins, minerals and digestive aids. It’s the smart choice for you and your old friend.

Benefits

- Equis® Golden Senior is safe to be fed as the **complete diet for horses unable to consume forages**. This is advantageous for horses who may not be able to chew hay, may have respiratory problems or allergies, or when high quality roughage is not available.
- Includes **Alltech® BioMOS®, Diamond V Yeast Culture®, Nuwen Calsea Powder Advance** at manufacturer’s recommended levels for your horse’s digestive wellness and immune balance through nutritional excellence.
- **Trust in the fixed formulation.** Equis formulas stay consistent every batch without the ingredient switching of least-cost formulation.
- Equis Golden Senior features **SelPlex® from Alltech®** as a natural yeast derived selenium source in response to the low availability of this trace mineral in northwest forages.
- Includes **Zinpro® 4-Plex EQ Performance Minerals®**. Equis feeds contain complexed trace minerals including zinc, manganese, copper and cobalt. These minerals may only be required in small amounts each day, but they play a critical role in numerous metabolic functions that affect the health of the horse.
- **Manufactured in the Northwest** for the northwest equine. Enjoy the benefits of a **premium feed** at an affordable cost.

Ingredients*

Wheat Middlings, Suncured Alfalfa, Corn Distillers Dried Grains with Solubles, Plain Dried Beet Pulp, Ground Oats, Molasses Products, Cane Molasses, Canola Oil, Salt, Calcium Carbonate, Calcite, Hydrolyzed Yeast, Yeast Culture, Zinc Methionine Complex, Manganese Methionine Complex, Copper Lysine Complex, Cobalt Glucoheptonate, Natural and Artificial Flavors Added, Preserved with (Propionic Acid, Sorbic Acid, Benzoic Acid), Acetic Acid, Silicon Dioxide, Ferrous Sulfate, Manganese Sulfate, Zinc Sulfate, Vitamin E Supplement, L-Lysine Hydrochloride, Basic Copper Chloride, Biotin, Mineral Oil, Choline Chloride, Vitamin A Supplement, Sodium Selenite, Ethylenediamine Dihydriodide, Vitamin D3 Supplement, Niacin Supplement, Vitamin B-12 Supplement, Calcium Pantothenate, Riboflavin Supplement, Selenium Yeast, Yucca Schidigera Extract, Roughage Products, Rice Bran, Magnesium Carbonate, Propionic Acid, Acetic Acid, Sorbic Acid, Benzoic Acid, Silicon Dioxide.

**Contains Alltech Bio-Mos®, Zinpro-4 Plex EQ, Nuwen Calsea Powder Advance; Protein, Fat and Fiber content may vary by region*

Biotin	minimum	0.45 mg/lb

Feeding directions

Activity	Feeding recomm. as a percentage of body weight (%)	Pounds of feed per 500 lbs of body weight (lb)
Maintenance (low) mostly hay based	< 0.4 + Ultramin or Daily 35% ***	< 2
Maintenance (moderate) with hay	0.4 - 0.8	2 - 4
Maintenance (high)	0.8 - 1.4	4 - 7
Complete - no hay	1.4 - 1.8	7 - 9

***When feeding less than recommended feeding amount of Equis Golden Senior add [Equis Ultramin \(/products/ultramin\)](/products/ultramin) or [Equis Daily 35% Supplement \(/products/daily-35\)](/products/daily-35) to complete your horse’s vitamin and mineral requirement (see tags for further recommendations).

- Feeding rates depend heavily on the quality of forage, activity level, age, breed, temperament and special needs of each horse.
- Changes in feed type or rate should be made gradually.
- Feeding a minimum of 1% of body weight in roughage is highly recommended.
- Fresh, clean water should be available at all times.
- Feed horses regularly, preferably two or more times daily.
- Do not feed old, moldy, or insect-infested feeds as they may cause illness, abortions or death.
- Store in a dry place.
