

No added sugars and completely free of molasses. That helps horses who are prone to laminitis, summer itch and insulin resistance.

Correct omega 3/6 ratio supports and promotes performance, fertility, stamina hoof, skin and coat quality and ability to concentrate. The high fibre level and coarse composition of the muesli stimulate chewing. A lot of chewing results in a high saliva production. Saliva neutralizes fluctuations in pH caused by feed. Therefore this muesli is particularly suitable for horses sensitive to stomach ulcer developments and/or stress.
