

Especially during the first months of their life, foals go through a large growth and therefore need high-quality food to support an optimal development. After weaning, the missing mother milk must be replaced by a proper nutrition.

Opti-GROW Foal pellets provide an optimal energy and protein supply and is composed of high quality and easily digestible natural raw materials.

Approx. 1 kg Opti-GROW per 100 kg bodyweight a day, from weaning until the age of 18 months. From the age of 18 months change to DraversBrok.

55lb Bag **\$36.50**
