

Super Horse® 12-12

A Heritage of Quality

Super Horse is a premium line of products that offers your horse total nutrition in one convenient package. Our feeding system allows you to choose the precise feed type and formula to meet your horse's specific life stage, roughage program, and energy level requirements. Super Horse uses only top-quality ingredients, refusing to substitute lesser ingredients to lower our costs.

- Choose the precise feed type and formula
- Always made with top-quality ingredients
- Higher-quality feed is more efficient, meaning you can feed less

The Super Horse Value Equation

Quality ingredients cost more. So, while you'll pay a little more per pound for Super Horse feeds, since you don't have to feed as much to your horses it actually costs you less per horse. A less expensive bag of feed could be costing you hundreds of dollars more a year to feed! And because Super Horse includes key ingredients such as Calf-Manna®, protected minerals and digestive aids, no additional supplements are needed, saving you even more money!

Indications:

Textured sweet feed for mature performance horses, gestating mares and off-season stallions.

	Mature Performance Horses	Gestating Mares and Off-Season Stallions
Suggested Feeding Rate*	6–10 lbs per day	6–8 lbs per day
Other Guidelines	Feed along with a minimum of 12–15 lbs good-quality hay and/or pasture per day. Provide free-choice access to plain salt and water. Some horses will be able to maintain the desired body condition on less than six lbs of Super Horse Performance 12 per day.	Feed along with free-choice access to good-quality hay and/or pasture, plain salt, and water.

Directions For Use:

High-quality hay and/or pasture should make up at least half of the complete diet. Feed Super Horse 12-12 to mature performance horses, gestating mares, and off-season stallions at a level necessary to maintain the desired body condition and performance level. As a starting guideline, feed 6–8 lbs of Super Horse® 12-12 per day along with good-quality hay and/or pasture. Some horses will be able to maintain the

desired body condition on less than six lbs of Super Horse® 12-12 per day. Always feed a minimum of 10–12 lbs hay and/or pasture per day and provide free-choice access to salt and water.

Change to this feed from other equine products gradually over a 5- to 7-day period. **Do not** cut this feed with oats or other grains. **Do not** overfeed or offer this product on a free-choice basis. Divide the grain ration into two or more feedings per day. **Do not** feed more than 0.5% of the horse's body weight in grain ration at any one time. Maintain a regular feeding schedule. Provide fresh, clean water, plain salt and adequate forage at all times. **Do not** allow hot, exercised horses free-choice access to water until they have cooled down.

Caution: This product contains supplemental selenium. Do not feed this product at levels greater than recommended or in combination with other products containing supplemental selenium if the selenium concentration of the complete diet will exceed 0.03 ppm.

Reminder: Feed is perishable. Store this product in a cool, dry area away from rodents and insects.

Warning: DO NOT feed any product that is spoiled, moldy, rodent or insect infested, or abnormal in appearance or odor, as it may cause illness or death. This product contains supplemental copper. DO NOT feed to sheep or other copper-sensitive species.
