

NO. 5 YEARLING CUBES

NON-HEATING CONDITION AND NUTRITIONAL SUPPORT FOR GROWING YOUNGSTOCK

TARGETED AT

- Yearlings to three-year-olds, of all breeds, requiring non-heating calories
- Fussy feeders who may selectively avoid some mix ingredients
- Youngsters being prepared for the sales or show ring
- Studs who feed youngsters in groups

Yearling Cubes are particularly suitable for those youngstock being prepared for the sales or show ring or Thoroughbred yearlings going into training as two year olds. Being highly digestible and energy dense they allow for the delivery of the required non-heating energy and supporting nutrients in a reduced volume, thus helping to avoid overloading the digestive system or exacerbating excitable temperaments.

Like all Baileys cubes, they are barley-free and formulated to promote outstanding muscle tone and condition whilst containing vitamins and minerals, including chelated minerals, to support continued growth. Like other products in Baileys' Stud Range, Yearling Cubes can, where necessary, be fed in reduced quantities alongside [Stud Balancer](#) to cut down the overall calorie content of the diet whilst maintaining essential nutrient levels.

One level Stubbs round bowl scoop holds around 1.8kg / 4lb of No.5 Yearling Cubes

Feeding Recommendations

- The following table suggests quantities of Yearling Cubes to be fed in pounds and kilograms per day when feeding ad lib good quality forage.
- Quantities are based on the "anticipated mature bodyweight" of the youngster or actual bodyweight of the adult horse. The actual/estimated bodyweights of a youngster's dam and/or sire are a good basis from which to estimate the "anticipated mature bodyweight" ie. the bodyweight you believe the youngster will attain as an adult.

FEEDING RECOMMENDATIONS (per day)

Anticipated Mature Bodyweight

kgs & lbs	440 - 660 lbs 200 - 300 kgs		660 - 880 lbs 300 - 400 kgs		880 - 1100 lbs 400 - 500 kgs		1100 - 1320 lbs 500 - 600 kgs		1320 - 1540 lbs 600 - 700 kgs		> 1540 lbs > 700 kgs	
	kg	lb	kg	lb	kg	lb	kg	lb	kg	lb	kg	lb
6 months	2.75	6	3.4	7.5	4.1	9	4.75	10.5	5.45	12	6	13.5
12 months	2	4.5	2.75	6	3.4	7.5	4.1	9	4.75	10.5	5.45	12

PREPPING THOROUGHBREDS FOR THE SALES

Feed 9-12lbs (4.1 - 4.75kg) per day with quality forage. Quantities can be increased or decreased accordingly.

COMPOSITION

Micronised Wheat, Wheatfeed, Alfalfa Meal, Soya Bean Meal, Oatfeed (by-product of the oat milling industry), Molasses, Extracted Sunflower Meal, Micronised Soya, Calcium Carbonate, Vitamins and Minerals, Soya Oil, Dicalcium Phosphate, Sodium Chloride, Calcined Magnesite, ScFOS (Digest Plus prebiotic).

ANALYTICAL CONSTITUENTS

Digestible Energy	13.5MJ/kg
Protein	15%
Oil	4%
Fibre	9.0%
