

PREP MIX

OUTSTANDING CONDITION AND SHINE WITH OPTIMUM GROWTH SUPPORT

TARGETED AT

Yearling to three-year-olds, of all breeds, requiring non-heating calories

Youngsters being prepared for the sales or show ring

Young horses in pre/early-training needing to keep a level head

Prep Mix has been specifically developed for growing foals and youngstock which are being prepared for the sales or show ring. It offers a highly palatable all-in-one solution to promoting superb condition, muscle tone and top line whilst providing all the essential nutrients to support growth. The mix is oat-free, with a super fibres and oil for slow release energy with the balance of Omega 3 and 6 fatty acids helping to bring a head-turning shine to the coat. The mix is nutrient dense so a smaller volume delivers the required energy and supporting nutrients without the risk of overloading the digestive system. Small frequent, digestible meals are key to reducing excessive glycaemic response and avoiding starch overload.

Being non-heating and highly digestible, Prep Mix helps avoid exacerbating excitable temperaments and contains yeast culture to stimulate fibre digesting bacteria and promote overall gut health. This is particularly beneficial at times of stress such as weaning and travelling as well as attending shows and sales. Like other products in Baileys Stud Range, Prep Mix can, where necessary, be fed in reduced quantities alongside [Stud Balancer](#) to cut down the overall calorie content of the diet whilst maintaining essential nutrient levels.

One level Stubbs round bowl scoop holds around 1.3kg / 2.75lbs of Prep Mix

Feeding Recommendations

- The following table suggests quantities of Prep Mix to be fed in pounds and kilogrammes per day when feeding ad lib good quality forage.
- Quantities are based on the “anticipated mature bodyweight” of the youngster or actual bodyweight of the adult horse. The actual/estimated bodyweights of a youngster’s dam and/or sire are a good basis from which to estimate the “anticipated mature bodyweight” ie. the bodyweight you believe the youngster will attain as an adult.

FEEDING RECOMMENDATIONS (per day)

kgs & lbs	Anticipated Mature Bodyweight											
	440 - 660 lbs 200 - 300 kgs		660 - 880 lbs 300 - 400 kgs		880 - 1100 lbs 400 - 500 kgs		1100 - 1320 lbs 500 - 600 kgs		1320 - 1540 lbs 600 - 700 kgs		> 1540 lbs > 700 kgs	
	kg	lb	kg	lb	kg	lb	kg	lb	kg	lb	kg	lb
6 months	2.75	6	3.4	7.5	4.1	9	4.75	10.5	5.45	12	6	13.5
12 months	2	4.5	2.75	6	3.4	7.5	4.1	9	4.75	10.5	5.45	12

PREPPING THOROUGHBREDS FOR THE SALES

Feed 9-12lbs (4.1 - 4.75kg) per day with quality forage.

Quantities can be increased or decreased accordingly.

COMPOSITION

Micronised Wheat, Micronised Barley, Soya Bean Meal, Soya Hulls, Molasses, Micronised Soya, Micronised Maize, Soya Oil, Micronised Peas, Alfalfa Meal, Dicalcium Phosphate, Distillers' Grains, Oatfeed, Sugar Beet Pulp, Calcium Carbonate, Vitamins and Minerals, Micronised Linseed, Whey, Calcined Magnesite, Sodium Chloride, (ScFOS) Digest Plus prebiotic 2.5g/kg, L-Lysine, DL-Methionine

ANALYTICAL CONSTITUENTS

Digestible Energy	13.5MJ/kg
Protein	15%
Oil	6.5%
Fibre	7.5%
Ash	7.5%
Starch	30%
Sugar	7%
