SU-PER[®] Aller-G

Supports Respiratory Health!

Supports normal lung function and health. Assists the body in combating environmental pollutants.

An allergy is the immune system's response to something that the body doesn't know what to do with. While the allergen is not necessarily harmful to the body, there is still a negative reaction when the body is exposed to it. Allergens can be common substances such as pollens, molds, common feed ingredients, or even environmental pollutants. Every horse is a little different in this respect, but once the immune system has deemed a substance to be a potential threat, it will respond to these same substances each time they are encountered.

SU-PER[®] Aller-G is a blend of stabilized flax seed meal and isolated herbal extracts designed to help lessen this allergic response to allergens. It helps by supporting normal immune system response, proper lung function, and providing respiratory support. There is no way to completely avoid certain allergic reactions, but lessening the immune response to these allergens helps to minimize symptoms, keep the immune system healthy for when it is truly needed, and support general health.

SU-PER[®] Aller-G contains Grape Seed Extract, which has been used quite successfully to lessen allergic reactions. Grape Seed Extract contains high amounts of a flavonoid called Proanthocyanidin, which has been shown to inhibit the production of histamine. Histamine is the chemical that produces inflammation when an allergen is encountered, leading to the typical symptoms of allergies like nasal congestion and swelling, itchy eyes or skin, digestive issues and more. By limiting histamine production, Grape Seed Extract can help minimize the symptoms of common allergies.

SU-PER[®] Aller-G also utilizes Bromelain, Echinacea, and a bioflavanoid complex containing Quercitin. These nutrients also work to minimize symptoms of allergies, but do so by boosting the immune system, keeping airways open when allergens are present, and helping to flush these allergens out of the body quickly. This combination of nutrients is great for combating seasonal allergies, as well as specific food or environmental allergies your horse may react to.
