SU-PER[®] B-Plex

Support for More Energy, Increased Stamina, and Improved Focus!

Full spectrum B-Complex vitamins and minerals to help maintain the health of horses.

NEW FORMULA - ADDED INGREDIENTS - SAME LOW PRICE!

In addition to the original **SU-PER[®] B-Plex** ingredients, we now include Folic Acid and Biotin to complete the full spectrum of B-Complex vitamins! The addition of these ingredients will provide increased support for healthy red blood cells and hoof care, along with the many benefits already provided by the B vitamins in **SU-PER[®] B-Plex**!

B-Complex vitamins serve many purposes nutritionally, especially when it comes to the performance horse.

- **Vitamin B-1** (Thiamine) is a great choice for calming the nervous horse and for increasing the appetite.
- **Vitamin B-2** (Riboflavin) plays a role in the utilization of nutrients and formation of tissues, organs, and red blood cells.
 - **Vitamin B-3** (Niacin) supports normal glandular function and assists in detoxifying the liver.
- **Vitamin B-5** (Pantothenic Acid) works with other B vitamins to utilize nutrients for fuel, and to support the nervous system.
 - **Vitamin B-6** (Pyridoxine) helps create neurotransmitters for proper brain function and mood regulation.
 - **Vitamin B-7** (Biotin) Supports the formation of healthy hooves, skin and coat.
 - **Vitamin B-9** (Folic Acid) helps to create and maintain new cells in the body and protects DNA.
- **Vitamin B-12** (Cyanocobalamin) is crucial in developing new red blood cells and overall energy production.

We offer various combinations of B-Complex vitamins in many of our products to help address specific needs. B-Complex vitamins, however, are at their best when they can work with each other - they are dependant on one another in countless functions in the body. Combining all of the B-Complex vitamins together provides multiple benefits to the performance horse, and can improve overall health in all horses.

SU-PER[®] B-Plex is a product that combines all of the major B-Complex vitamins together in one supplement. It is designed to help create more energy, maintain proper metabolism, aid in proper digestion and nutrient absorption, and maintain a calm disposition in stressful environments. These benefits are all crucial to optimum performance.

SU-PER[®] B-Plex is the choice of many owners and trainers because not only does it give that extra little energy boost leading up to competition, but it also allows the horse to maintain optimal health during a long season and reduces recovery times after competition.

SU-PER[®] B-Plex also provides additional vitamins and minerals to guard against nutritional deficiencies that are more common during training.

SU-PER[®] B-Plex is available in a powder for daily feeding, and in a paste for a quick boost right before competition.
