## SU-PER<sup>®</sup> GastroShield

*Supports a Healthy Digestion and Intestinal Tract!*

**Contains ingredients that soothe and buffer the stomach against gastric acid.**

**SU-PER<sup>®</sup> GastroShield** is a unique blend of mild antacids, coating and soothing agents, probiotics, and support nutrients designed specifically for horses with a history of gastric ulcers, or those at risk of developing gastric issues due to stress, diet, or training demands. Studies have suggested that up to 80% of racehorses, and 60% of other active horses have serious gastric issues due to the demands on the body and mind.

Medications like UlcerGuard or GastroGuard (containing proton pump inhibitors like Omeprazole) can get serious issues under control quickly, and are a great tool when dealing with a very serious issue. However, in addition to being very expensive, these types of products have several risks and cautions associated with long term use. Once an initial treatment is completed, we recommend transitioning to our **SU-PER<sup>®</sup> GastroShield**, which is safe for long-term use, and helps maintain stomach and gastric health, and to minimize reoccurrence.

**SU-PER<sup>®</sup> GastroShield** is a multi-action supplement that does far more than just temporarily block stomach acid production. **SU-PER<sup>®</sup> GastroShield** contains mild antacids that lower stomach acid levels slightly, without creating a "rebound" effect seen in large doses of some products on the market. Next, it uses DeGlycyrrhized Licorice (DGL), Slippery Elm, Marshmallow Root, and other ingredients to ensure there is a proper mucous membrane lining the stomach and protecting any damaged tissue, allowing for normal healing and protection. In addition, **SU-PER<sup>®</sup> GastroShield** contains ingredients that are soothing to the stomach to help with discomfort and irritability. And finally, it includes ingredients to support normal digestion and utilization of nutrients in the diet, which are often diminished during typical gastric treatments.

**SU-PER<sup>®</sup> GastroShield** can be used in horses with existing issues, or as a daily maintenance for horses on high-grain diets or those exposed regularly to stress. It can also be used as a follow-up or as a replacement to expensive treatments such as omeprazole or ranitidine, at a fraction of the price.

We are often asked why our gastric product is powder, when other companies produce similar products as a pellet. Simply put, **SU-PER<sup>®</sup> GastroShield** has ingredients that work much better in a powder form, when pelletizing these ingredients, the heat processing can result in a significant loss of benefits.

---

**NOTE:** **SU-PER<sup>®</sup> GastroShield** contains "herbal" type ingredients, that are generally discouraged by the USEP regulating body. Licorice is one of these herbs, as licorice in most forms may contain Eugenol - which is a banned substance that USEF claims to have anti-inflammatory properties.

**SU-PER<sup>®</sup> GastroShield** however, contains a specific type of licorice known as DeGlycyrrhized Licorice (DGL). Our DGL is guaranteed to be Eugenol-free, and therefore should not result in a positive test.

Although we maintain our product is okay to give and will not test positive, the USEF and other equine organizations are constantly updating their rules and testing methods, so if you have any concern that **SU-PER<sup>®</sup> GastroShield** may in fact be deemed as restricted or prohibited by the equine organization you may be involved with, we recommend you withdraw from use of this product no less than 14 days prior to the event. If you require gastric support in the period leading up to an event, it is safe to use basic antacids such as Calcium or Magnesium for this period.
