SU-PER[®] Jug

Helps Support Normal Energy, Stamina, and Performance!

Provides a complete spectrum of vitamin, minerals, amino acids, and electrolytes to support good health.

SU-PER[®] Jug was designed to mimic the old practice of giving an overall nutritional booster to your horse just before competition, and/or afterwards to replace lost nutrients and electrolytes.

SU-PER[®] Jug contains nutrients similar to those found in what they called a veterinarian's "jug" treatment, but in an easy to use paste.

The broad spectrum of electrolytes, amino acids, vitamins, and minerals works to help to provide energy, improve stamina, and ensure proper hydration before the race. After an event, it works to restore electrolyte balance, replenish lost nutrients, and jump-start the recovery process.

Our **SU-PER[®] Jug** is an easy to administer paste that can be used whenever your horse needs that little extra boost of performance or a head start on recovery. Even when traveling or spending a long day at the arena, **SU-PER[®] Jug** can be given anytime, anywhere.

SU-PER[®] Jug can also be used during normal exercise in hot conditions in place of a standard electrolyte, and is safe for all classes of horses.
