

SU-PER[®] Leanabolic

Supports Normal Muscle and Nervous Systems!

Training and performance support for exercising muscle.

SU-PER[®] Leanabolic is a complete training and conditioning supplement, and helps increase and maintain lean muscle mass, improves strength and stamina, and supports the production of energy needed for optimal performance.

SU-PER[®] Leanabolic is formulated with the performance horse in mind, containing high levels of Gamma Oryzanol and Branched Chain Amino Acids to build lean muscle, and specific isolated amino acids to help maintain muscle during periods of stress or intense training.

SU-PER[®] Leanabolic utilizes Kre-Alkalyn - a human-grade, buffered Creatine used to increase muscle strength and the production of ATP - the body's natural source of energy for muscles.

SU-PER[®] Leanabolic also provides numerous vitamins, minerals and support nutrients to support recovery after exercise, to replenish lost nutrients and maintain general health through the stresses of intense training.

SU-PER[®] Leanabolic is a popular choice for getting horses ready for the competitive season.

It's the perfect supplement for maintaining strength and stamina throughout a long season, recovery from injury, or during stressful times.

It is safe for older horses as well, helping to maintain body weight and muscle mass in periods of inactivity or illness.

SU-PER[®] Leanabolic is drug-free, test-free, and can be used safely on horses of any age.
