

## *SU-PER<sup>®</sup> Meta-Balance*

*Supports Proper Metabolic Function!*

**Supports blood sugar regulation. For best results, give in combination with an overall vitamin/mineral supplement such as *SU-PER<sup>®</sup> Form*. Consult your veterinarian for guidance on specific dietary needs.**

*SU-PER<sup>®</sup> Meta-Balance* is a blend of minerals, vitamins, herbal extracts, bioflavonoids and probiotics to provide complete support for proper metabolic function, overall digestive health and efficient nutrient absorption.

*SU-PER<sup>®</sup> Meta-Balance* can be used to help support proper insulin function and blood sugar regulation in horses suffering from pituitary issues, insulin resistance, glucose intolerance, and other similar metabolic disorders. Some symptoms of metabolic issues include being overweight, having cresty necks, or being an extremely “easy keeper”.

*SU-PER<sup>®</sup> Meta-Balance* contains Magnesium (as Magnesium Proteinate), Chromium, and other specific nutrients chosen for their ability to maintain proper metabolism and help regulate glucose and insulin levels.

*SU-PER<sup>®</sup> Meta-Balance* also contains high levels of Vitamins A, E, and C, as well as powerful antioxidants such as Grape Seed Extract and Alpha Lipoic Acid, and a full array of probiotics to help with digestion and nutrient absorption.

Metabolic disorders are often lifelong problems, and will continue to affect the horse negatively unless treatment is consistent and a restricted diet is followed daily. A diet low in simple carbohydrates, in combination with daily supplementation of *SU-PER<sup>®</sup> Meta-Balance* is a very effective way to minimize the effects of a metabolic disorder.

For optimum results, we also recommend a supplement high in Essential Fatty Acids, such as *SU-PER<sup>®</sup> OmegaFLAX* or *SU-PER<sup>®</sup> OmegaBOOST*. Also be sure to check with the manufacturer of any feed concentrates you are feeding to ensure they are formulated to be low in sugar and starch.
