SU-PER[®] PowerFlex H.A.

Helps Support the Structural Integrity of Connective Tissue!

**Our ultimate joint supplement. Supports healthy joints.
Recommended to support and maintain healthy joint function.**

If your horse is suffering from joint issues, and the average joint supplement is not giving you the results your horse needs, you may need something a bit more powerful. *SU-PER[®] Powerflex H.A.* is a complete joint health supplement, combining high levels of powerful herbs (Devil's Claw, White Willow, Yucca), anti-oxidants (Vitamin E, Alpha Lipoic Acid, Superoxide Dismutase), and joint nutrients (Glucosamine HCl, Chondroitin Sulfate, MSM), along with a wide range of support nutrients. *SU-PER[®] Powerflex H.A.* boosts all these nutrients with the power of pure **Hyaluronic Acid**, giving the body it's best possible chance to manage discomfort and ease joint stiffness.

Horses with severe joint issues have additional nutritional needs which aren't normally addressed in your average joint supplement. Basic Glucosamine and/or Chondroitin Sulfate supplements have been proven very effective in managing minor to moderate joint problems. These two nutrients are essential to the health of joint cartilage. The limiting factor in how well these nutrients will work in the joint areas is often in how effectively these nutrients can be delivered to the joint area. In horses with more serious issues, inflammation in the joint area keeps nutrients and oxygen from getting where it needs to be. *SU-PER[®] Powerflex H.A.* uses Devil's Claw, MSM, Yucca, and White Willow Bark help to support a normal inflammatory response in horses with serious joint issues, and allow for proper delivery of critical joint nutrients.

In addition to inflammation, the other major factor which limits joint repair and damages healthy tissues is free radicals. Free radicals are toxins which are by-products produced by the body through the natural use of energy in the body, and other essential functions of the body. By neutralizing these free radicals and protecting healthy cells with anti-oxidants, the body is much more efficient at maintaining joint cartilage and connective tissues. Grape Seed Extract, Superoxide Dismutase, and Bioflavonoid Complexes are just a few of the anti-oxidants in *SU-PER[®] Powerflex H.A.*

The final area of focus for severe joint conditions is maintaining joint health is the synovial fluid. Synovial fluid is what gives the joint it's "cushion" - without fluid, joint mobility is severely decreased, and friction within the joint will start to tear the cartilage apart. *SU-PER[®] Powerflex H.A.* works to maintain a high level of synovial fluid in the joint through providing an optimum amount of Hyaluronic Acid, the main constituent of synovial fluid. Supplementation leads to an increase in fluid, allowing the joint to have the "cushion" it needs to maintain proper joint health.

SU-PER[®] Powerflex H.A. is not intended for pregnant or lactating mares, but is safe and effective for use on all others, regardless of age or discipline.
