SU-PER[®] Pre-Race

Performance Support for Exercising Muscle!

Our 4-day program to support physical and mental performance.

SU-PER[®] Pre-Race is a pre-competition paste that helps to prepare your horse for any upcoming event. It is a unique blend of buffered Creatine, isolated Amino Acids, Herbal Extracts, Anti-oxidants and more. It is designed to help support both physical and mental performance through proper nutrition.

SU-PER[®] Pre-Race is designed to increase energy, stamina, and endurance to support athletic performance. It also works to minimize the release and buildup of lactic acid in the bloodstream, which delays fatigue, combats tying up, and reduces post-exercise recovery time.

SU-PER[®] Pre-Race offers support before, during and after competition.

SU-PER[®] Pre-Race is also unique in the way it is fed. It is offered in a 4-pack of syringes, and is given for 4 days leading up to the competition. This allows the body time to fully prepare for the upcoming competition without wild swings in energy level or mental focus. This extended preparation time allows the horse to also remain calm and poised leading up to the event, yet fully prepared when it's time for superior performance.

Formulated with key nutrients:

Carnitine and Carnosine: Help limit lactic acid buildup in muscles and in the bloodstream, as well as assist the body in using oxygen more efficiently.

Kre-Alkalyn: A buffered, stable form of Creatine that may be up to 5 times more effective than Creatine Monohydrate in terms of fueling energy production during exercise.

DMG: Increases oxygen uptake in the bloodstream, delaying fatigue.

B-Complex Vitamins: Necessary for energy production, red blood cell formation, and mental focus in times of stress.

Ginseng: Increases energy levels, helps manage stress, and helps support healthy mental function.

SU-PER[®] Pre-Race is not meant as a daily supplement, and should be given as recommended for best results. Be sure to check with your equine organization before feeding if they typically have restrictions on herbal ingredients or non-essential nutrients.
