

SU-PER[®] PulmoShield

Helps Support the Normal Integrity and Function of the Lungs!

Helps support normal pulmonary and respiratory function.

Exercise Induced Pulmonary Hemorrhaging (EIPH - bleeding) is a far too common problem for equine athletes. The problem is not often recognized because very few horses actually show the signs of EIPH. Studies indicate that 60-80% of all performance horses bleed in the lungs, but only 1-2% shed enough blood for it to be seen coming out the nose.

Why do horses bleed? Most believe it has to do with the high blood capillary pressure which occurs in the lungs of the horse when it is running or competing. The evolution of the horse has provided them with the ability to run quickly for short distances to avoid danger. These traits allow them to provide their muscles with large amounts of oxygen to the muscles to create the ability to run quickly. However, these same traits result in an increase the blood pressure, leading to lung bleeding.

When the horse gets excited, the spleen provides a release of extra red blood cells into the circulation. This increased volume of blood then increases the pressure within the blood vessels and capillaries. The heart beat also increases dramatically which increases the blood pressure. With such large volume of blood pumping through the circulatory system and the dramatic increase in blood pressure, weaker capillaries and blood vessels in the lungs will eventually burst under the pressure.

We believe there is a way to help minimize EIPH or the occurrence of bleeding, by going directly to the capillaries and blood vessels themselves - to make them stronger, more resilient, and more permeable.

SU-PER PulmoShield does just that. It is a dietary supplement made up of vitamins, minerals, and concentrated herbal extracts which work to minimize the occurrence of EIPH by creating and maintaining stronger capillaries. In addition to making them stronger and less likely to burst, **SU-PER PulmoShield** also makes sure the capillaries are constantly permeable and resilient, in effect meaning the healthy capillaries will "bend but not break" when under extreme pressure.

SU-PER[®] PulmoShield also supports normal blood pressure. By regulating the pressure of blood flow through the circulatory system with the use of herbal extracts and support nutrients, there is less strain put on capillaries in the lungs during exercise. It also assists in the efficiency of oxygen and nutrient delivery throughout the body, helping to support stamina and endurance while at the same time maintaining normal circulatory function.

If you know your horse is a bleeder, or are concerned that your horse MAY be a bleeder, or if you are noticing an unexplained decline in performance and stamina, **SU-PER[®] PulmoShield** may be able to help!

SU-PER® PulmoShield comes in a powder for daily feeding, and a specifically formulated paste for giving just prior to competition or training. We recommend feeding the powder daily to prepare the body for exercise, and give the paste on the day of competition for additional support.

PASTE
30 CC - 1 serving

POWDER
4 Pounds - 32 servings
20 Pounds - 160 servings

Helps support normal pulmonary and respiratory function!

DIRECTIONS FOR USE:

Maintenance: Give 2 ounces daily.
For four days leading up to strenuous work or competition:
 Give 4 ounces daily.

A two ounce scoop is enclosed.

BENEFITS of Flax Seed Meal

- Optimum Omega 3 to Omega 6 Fatty Acid Ratio
- Corn-Free and Soy-Free Formula
- Promotes Healthy Skin & Coat
- Supports Glucose Metabolism and Gut Health
- Supports Normal Blood Pressure

For Equine Use Only.

Lot Number
503030
Best if used by
March 2023

SU-PER® **PASTE**
PulmoShield

Helps Support Normal Integrity and Function of the Lungs!

Helps support normal pulmonary and respiratory function!

DIRECTIONS FOR USE:
 Administer directly on back of horse's tongue. Prior to competition or strenuous work: Give ½ tube each day for 4 days. On the day of competition or strenuous work: Give 1 full tube.

CAUTIONS: Safe use in pregnant animals or animals intended for breeding has not been proven. If animal's condition worsens or does not improve, stop product administration and consult your veterinarian. **WARNINGS:** Keep out of reach of children and animals. In case of accidental overdose, contact a health professional immediately. This product should not be given to animals intended for human consumption.

Product Facts	
Serving Size: 30 cc	
Servings per tube: 1	
Active Ingredients per 30 cc	
Vitamin C	3,125 mg.
L-Camifine	1,000 mg.
N, N-DiMethylGlycine (DMG)	500 mg.
Grape Seed Extract	250 mg.
Quercetin	275 mg.
Hawthorn Extract	150 mg.
Oat Straw Extract (source of Silica)	110 mg.
Bioflavonoid Complex	500 mg.
Vitamin A	54,000 I.U.
Vitamin D-3	2,148 I.U.
Vitamin E	64 I.U.
Inactive Ingredients: Natural Flavor, Water, Xanthan Gum.	

SU-PER PulmoShield Paste. **For Equine Use only.**
