

SU-PER[®] Stress-Ex

Water Soluble Electrolytes!

Helps maintain normal body fluid levels.

Electrolytes are an important tool to ensure your horse stays healthy and hydrated. Just like people, horses lose body fluids in periods of high heat, training, or physical activity in general. Along with the loss of water, they also lose electrolytes themselves, which need to be replenished.

Electrolytes help support normal nerve and muscle function, as well as nearly all other physiological functions in the body. In addition to the replacement of lost nutrients, a supplemental electrolyte will prompt the horse to drink more water, guarding against dehydration naturally.

SU-PER[®] StressEx is an orange-flavored, water-soluble, dextrose-based electrolyte that contains the proper ratios of essential electrolytes to replace those lost during exercise and/or hot conditions.

While it can be top-dressed on the feed, it is primarily designed to be added directly to drinking water. This allows *SU-PER[®] StressEx* to be administered while traveling, during breaks in competition, on the trail, or just about anywhere you have the opportunity to provide drinking water. *SU-PER[®] StressEx* not only replenishes lost electrolytes, but also promotes proper hydration during exercise or in hot humid conditions.

Whenever possible, we recommend providing both *SU-PER[®] StressEx* in water as well as additional bucket of fresh water, to allow your horse a choice of which they prefer. Horses will often drink from both as needed. *SU-PER[®] StressEx* can also be used daily to encourage normal water intake and maintain proper fluid levels.
