

## *SU-PER<sup>®</sup> Tryptophane*

*Helps Maintain Calmness and Supports Balanced Behavior!*

**This product will not inhibit physical performance.**

Horses have evolved to take advantage of their “fight or flight” instinct in response to danger. They are constantly on alert for all manner of threat. While this serves them well in the wild, it is this genetic wiring that tends to make them far more sensitive to stressful situations than most other animals or humans. The heightened stress response often leads to anxiety, nervousness, poor behavior and lack of focus.

Every horse is different in the amount of stress they can tolerate, and what situations or places might trigger that stress. And while you can't always keep your horse out of stressful situations, you can help to lessen the reaction they have to that stress.

*SU-PER<sup>®</sup> Tryptophane* is a calming supplement, providing L-Tryptophan in an apple flavored base. This isolated amino acid can be used to promote a calming effect in horses who are nervous, excited or stressed. It can be used on a daily basis for horses that are generally nervous, or given as needed an hour before competition, show or transport.

Tryptophan has long been the top choice for calming nervous or anxious horses, as it does not have any harmful side effects, it is not a sedative, and most importantly does not impair the horse's focus or overall performance. Tryptophan has a calming effect, but does not take away from the horses ability to compete or work.

*SU-PER<sup>®</sup> Tryptophane* is a popular, economical choice to help provide a calming effect and support balanced behavior.

We also offer L-Tryptophan in our *SU-PER<sup>®</sup> Calm*, which includes various herbal extracts to enhance the calming effect. However, some equine organizations restrict the use of herbal supplements, which makes *SU-PER<sup>®</sup> Tryptophane* a safe choice for use in most organized equine sports. Be sure to check with your organization to confirm whether or not L-Tryptophan is allowed for use prior to competition.
