

# Hemp Hulls and Hearts

Cracked hemp hulls and kernels for horses

- Contains Omega 3, fibre and over 20% oil
- Superior amino acids
- May support joint function
- Australian grown and processed

## What are Hemp Hulls and Hearts?

Hemp hulls are the shell of the hemp heart/seed that remains after the seed has been extracted. During the de-hulling process a certain percent (approx. 20%) of the seed remains, resulting in this blended Hemp Hulls and Hearts product. They are an excellent source of fibre and amino acids, and provide the essential fatty acids omega 3 and 6.

Hemp in the human market is fast becoming established as a super food and has been used in food, tea and medicine in China for at least 3000 years.

## Feeding Guidelines

May contain traces of THC

Introduce slowly into diet over two weeks

Feeding Rate	Grams p/day	Cups p/day
Maintenance	100 - 200g	1 - 2 cups
Performance	200 - 400g	2 - 4 cups

1 cup = 100g of Hemp Hulls and Hearts

Based on a 500kg horse

## Ingredients:

100% Australian grown and processed Hemp Hulls

## Sizes Available

5kg

## Why feed Hemp Hulls and Hearts?

Hemp Hulls and Hearts are an excellent source of high quality protein (20%) which supports muscle function, nutrient absorption, and other important body functions.

It also contains a superior amino acid profile with 9 essential amino acids that horses require for protein production. These amino acids are not naturally made by the horse and are vital for a horse's health especially in regards to the building, fueling and recovery of muscles during exercise.

Hemp Hulls and Hearts contains more than 20% oil, mostly in the form of the essential fatty acids Omega 3 and 6, also Omega 9. Omega 3's have anti-inflammatory benefits which support joint and immune system function.

The hemp oil also provides a source of Gamma Linoleic Acid (GLA). GLA in humans has been linked to supporting hormonal imbalances in females along with improved brain function.

Hemp Hulls and Hearts is low in sugar and starch as well as containing useful levels of digestible

fibre (almost 30%), favourable when feeding a high fibre, low sugar and starch diet. It can be fed to all classes of horses including those with grain intolerances or metabolic issues.

Hemp Hulls and Hearts also contains anti-oxidants in the form of Vitamin E as well as Magnesium, Zinc, phosphorus and Calcium. Hemp Hulls and Hearts is a GMO free product, and is Australian grown and processed.

## Typical Analysis (dry matter)

Nutrient	Amount
Digestible Energy	14.7Mj/Kg
Protein	20%
Ash	4.7%
Fat	23%
Crude Fibre	29.7%
Dry Matter %	92.4%
Moisture %	7.6%
Starch	>0.1%
Free sugars	1.4%

## Testimonial

"I run a Horse Agistment business outside Brisbane, and have had over two hundred horses go through over the last 10 years. In all the time I have been here we have struggled with Queensland itch horses when they come through. I have fed and washed horses with everything going, and nothing ever seemed to work. If you are super vigilant and rug constantly using ear protect fly mask and covering with invasive pesticides....you MIGHT have half a chance. **Well.... I have started using a Hemp Hull and Hearts (HHH), from Stance, and the results speak for themselves.** Here's a picture of Molly who is an extreme itch case.

This is without having any fly mask on at all after a month. She has no bites anywhere at the moment, and the only thing different is the mix. All those black marks are where she is usually raw. I have been through so many rugs and fly masks it's ridiculous. Final words.... give it a go"

Judy Motion, Copperfield Stables, 2019
