

BUILD A[®]

RAPID CONDITION AND SHINE

CONDITIONING FORMULA

Your horse's condition is a key indicator of overall health and wellbeing. The combination of extruded barley, quality amino acids derived from canola meal and the cool conditioning properties of oil, make BUILD A[®] the ideal choice for weight gain and conditioning.

BALANCED NUTRIENT PROFILE

BUILD A[®] is fortified with a premium blend of vitamins and chelated minerals to meet the nutritional requirements of a wide range of horses and activity levels, ranging from pleasure to performance. Fed in conjunction with roughage, you can trust BUILD A[®] to provide your horse with its daily nutrient requirements.

ENHANCED DIGESTIVE SUPPORT

BUILD A[®] is produced using steam extrusion technology which utilises heat and pressure to reconfigure starch molecules (gelatinisation). Starch gelatinisation significantly increases grain digestibility and nutrient utilisation within the small intestine, thereby reducing the burden on the hindgut and minimising risk of dietary induced disturbance. Prebiotics promote the growth of beneficial microorganisms within the hindgut and support the horse's immune system.

HOOF AND COAT HEALTH

BUILD A[®] is fortified with biotin, zinc and oil, essential in maintaining strong hooves, healthy skin and coat shine.
