

CAVALOR SUPERFORCE

Textured feed for sport horses performing high intensity exercise.

Ingredients

Whole Oats| Soybean Hulls| Wheat Middlings| Puffed Barley| Puffed Wheat| Puffed Corn| Molasses| Flaxseed| Dehydrated Alfalfa Meal| Ground Corn| Pea Flakes| Soybean Meal| Salt| Soybean Oil| Canola Meal| Ground Wheat| Sunflower Seed Meal| Calcium Carbonate| Sodium Bicarbonate| Yeast Culture| Vitamin A Supplement| Vitamin E Supplement| Vitamin D₃ Supplement| Choline Chloride| Manganese Sulfate| Zinc Sulfate| Betaine Hydrochloride| Niacin Supplement (Vit. B₃)| Iron Sulfate| Copper Sulfate| Manganese Glycine Complex| Zinc Glycine Complex| Calcium Pantothenate (Vit. B₅)| Riboflavin Supplement (Vit. B₂)| Calcium L-Ascorbyl - 2- Monophosphate (Vit. C)| Copper Glycine Complex| Iron Glycine Complex| Thiamine Mononitrate (Vit. B₁)| Folic Acid (Vit. B₉)| Calcium Iodate| Pyridoxine Hydrochloride (Vit. B₆)| Cobalt Carbonate| Sodium Selenite| Tocopherols (preservative)| Biotin (Vit. B₇)| Selenium Methionine Complex| Vitamin B₁₂ Supplement

Guaranteed Analysis

Digestible energy	3.3 Mcal/kg – 1.5 Mcal/lb
Crude protein	Min. 12.0 %
Lysine	Min. 0.5 %
Methionine	Min. 0.3 %
Threonine	Min. 0.4 %
Crude fat	Min. 6.5 %
Crude fiber	Max. 12.0 %
Acid detergent fiber	Max. 13.0 %
Neutral detergent fiber	Max. 25.0 %
Starch	Max. 27.0 %
Sugar	Max. 4.5 %
Calcium	Min. 0.8 – Max. 1.3 %
Phosphorus	Min. 0.6 %
Sodium	Min. 0.7 % - Max. 1.2 %
Salt	Min. 1.5 % – Max. 2.0 %
Magnesium	Min. 0.3 %
Potassium	Min. 0.8 %
Copper	Min. 47.5 ppm
Zinc	Min. 108.3 ppm
Iron	Min. 50.0 ppm
Manganese	Min. 112.5 ppm
Cobalt	Min. 0.8 ppm
Selenium	Min. 0.3 ppm
Vitamin A	Min. 14260 IU/kg - 6481 IU/lb
Vitamin D	Min. 1933 IU/kg – 879 IU/lb

Vitamin E	Min. 332 IU/kg – 151 IU/lb
Vitamin B3 (Niacin)	Min. 39 ppm
Biotin	Min. 0.2 ppm
Saccharomyces Cerevisiae Yeast Culture	100 million CFU/kg - 45 million CFU/lb.

How to Use?

For optimal nutrition, welfare and performance, your horse needs adequate forage (spread out over several meals per day) and a constant supply of fresh drinking water. This foundation can be then supplemented with a balancer or concentrate feed as needed to meet all your horse's nutritional requirements. Lastly, you can fine-tune your horse's diet with supplements for specific needs.

#feedasyouneed

We recommend feeding a min. of 0.4 lbs and max. of 0.8 per 100 lbs body weight.

	Body weight in pounds			
	800	1000	1200	1400
	Forage lbs/day (min)			
	10	12.5	15	17.5
Exercise level	Superforce lbs/day (min)*			
Light work	3.25	4.0	4.75	5.5
Moderate work	4.0	5.0	6.0	7.0
Heavy work	4.5	5.5	6.75	7.75
Very heavy work	4.75	6.0	7.25	8.5

*Minimum feeding rates to meet all daily nutrient requirements in addition to at least 1.25 % of body weight in good quality hay.

These feeding recommendations are intended as a guideline only. Feeding rates may need to be adjusted based on forage quality and health status and activity level of the individual horse being fed.

Tips:

- Divide the feed over several portions per day, preferably after feeding forage. Always provide free access to clean, fresh water and a source of salt.
- Not all feed scoops are the same size. Weigh the contents of your feed scoop so that you know exactly how much your horse is being fed.
- If additional vitamin, mineral, protein or fat fortification is needed, check out our Cavalor balancer products or contact us for advice.
